DETAILED ACTION

Allowable Subject Matter

1. The following is a statement of reasons for the indication of allowable subject matter: Claim 1 is allowable over the art of record because the prior art does not teach a plurality of dual-frequency antennas configured to receive signals having first and second frequencies above the microwave band of the electromagnetic spectrum, and being arrayed to an effective length to re-radiate signals at a third frequency, and in combination with the remaining claimed limitations.
2. Claim 15 is allowable over the art of record because the prior art does not teach a method of transmitting a second electromagnetic beam at a second frequency above the microwave band of the electromagnetic spectrum and offset from the first frequency by a difference frequency; receiving the first and second electromagnetic beams at a high-frequency two-dimensional antenna comprising a plurality of dual-frequency antennas, each dual-frequency antenna including at least two dipole antennas, and in combination with the remaining claimed limitations.
